CERTIFICATES / BOOTCAMPS

Completed Full Stack Web Developer
bootcamp by Colt Steele

Certificate no : UC-KQLZAQN7
Certificate URL : ude.my/UC-KQLZAQN7

AWS Concepts Course by Linux Academy

Certificate no : UC-WAAHHKIO
Certificate URL : ude.my/UC-WAAHHKIO

PROJECTS

- Build a realtime chat app using React, Node.js, Socket.io and Express javascript. Also group chat feature is added, so that people can chat within respective group & group members.

- Build Youtube clone using react. Which fatches data from youtube api and give search results for respective videos and channels.

- Build a music / lyrics search application using React and musixmatch api. That give us diffrent track and its's lyrics. Aslo we get top tracks/ album with lyrics, release information, singer etc. There is option to select country wise tracks / albums which gives top 10 tracks/Album in that counrty.

- Build social media web website for developers. Which provides inform - ation about developers & their portfolio, education & experience. Also having feature of login & sign up.
